Casings and filters for containment systems

METAL CASE VHE FILTERS 30-70 m³/h

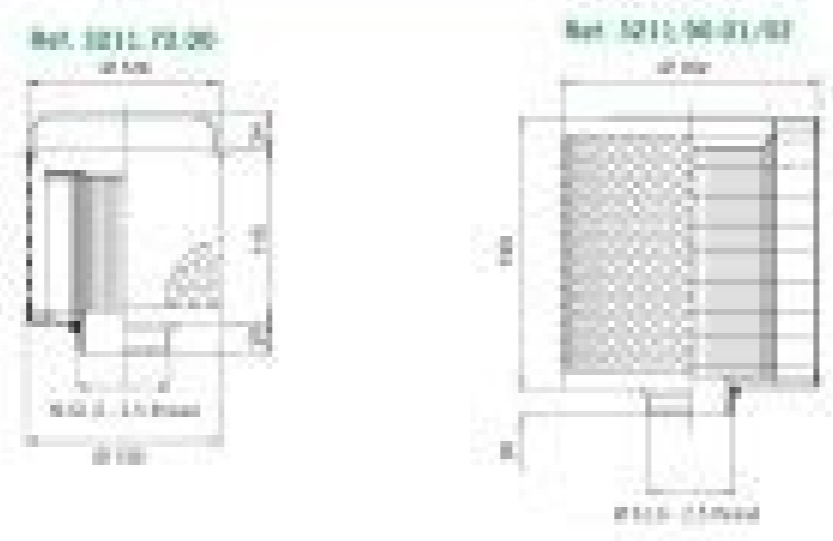

Advantages

- Temperature resistance
- Low calorific potential
- Preheating ability
- Has a performance guarantee sheet

Applications: Arresting dust, bacteria and aerosols; manometer protection; safety valve exhaust for nuclear and pharmaceutical industries and hospital establishments.
Type: Filters for glove boxes and containment enclosures.
Media: Glass fiber paper fibre classifi caton M1. Gamma irradiation resistance according to standard ASME-A0 1.
Separators: Glass fibre thread.
Sealant: Polyvinyl chloride (PVC fibre classifi caton M2)
Case: Zinc-chromate plated steel metal or stainless steel (304/316) depending on model.
Gasket: Viton O-ring.
Handle: I.
Unitaire efficiency: >99.98% (standard NF S 44-011).
Recommended final pressure drop: 600 Pa.
Admissible maximum pressure drop: 1000 Pa.
Unitaire decontamination factor: > 5000 (standard NF S 44-011).
Maximum airflow: Nominal airflow.
Temperature: 120° C maximum in continuous service and 200° C for 1 hour.
Control: Leak detector 100% of products.
Mounting systems: Stainless steel casing.
